DETAILED ACTION

Response to Applicants' Amendment and Argument

1. Applicants' arguments, see page 3, lines 7-18, filed on November 27th, 2007, with respect to the rejection(s) of claim(s) 1-8 under 35 U.S.C. 102(e) have been fully considered and are persuasive. Therefore, the rejection in Paper No. 20070619 has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Ma et al. (U.S. Patent 6,687,266). Claims 1-8 are pending in the application.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Ma et al. (U.S. Patent 6,687,266).

In re claim 1, Ma et al. disclose a metal complex compound having a partial structure represented by a following general formula (I):

wherein R¹ to R⁵ each independently represents a hydrogen atom, a cyano group, a nitro group, a halogen atom, a substituted or unsubstituted alkyl group

having 1 to 20 carbon atoms, a substituted or unsubstituted amino group, a substituted or unsubstituted alkoxy group having 1 to 20 carbon atoms, a substituted or unsubstituted alkylsilyl group having 1 to 20 carbon atoms, a substituted or unsubstituted acyl group having 1 to 20 carbon atoms or a substituted or unsubstituted aromatic group having 1 to 30 carbon atoms (see col. 11, line 9 to col. 12, line 65 and Table 1 in cols. 15-18); and
